## Profile

Software developer with 3+ years of experience in the IT sector and advanced studies in Information Systems Engineering (UAI). Focused on TypeScript-based development (Angular, React, and Next.js) and building APIs with .NET/.NET Core. Strong problem-solving mindset, collaborative work style, and a focus on best practices and continuous improvement in agile environments.

## Work Experience

### CartaSurCardsS.A.U. - Software Developer Analyst

Apr 2023 - Present | Buenos Aires

- Angular +TypeScript: built screens and reusable components, integrating with REST services.
- React & Next.js (TypeScript): hooks, state management, routing, forms, and API consumption.
- Performance/UX: lazy loading, code splitting, and frontend rendering best practices.
- Developed REST APIs in .NET/.NET Core using Clean Architecture, MVC, and SOLID principles; layered architecture (Domain / Application / Infrastructure / API), DI, validations, and centralized error handling.
- Integrated with SQL Server / EF Core and delivered secure, well-documented endpoints (Swagger/Postman).
- Production support: maintenance, optimization, and incident troubleshooting.
- Core system migration: from WPF to a web solution in Angular.
- Implemented RabbitMQ to publish and consume domain events across applications, using MassTransit, idempotency, and retry/DLQ handling for reliable delivery.

### ASI - Government of the City of Buenos Aires - QA Automation / Functional

Oct 2021 - Mar 2023

- Selenium WebDriver (Python) for test automation.
- Executed test cycles and managed issues in Jira based on requirements.
